Product Highlights & Considerations

Cassette vs. Classic Roman Shades

Cassette Roman shades consist of 4" contoured fabric folds under a matching fabric covered headrail and bottomrail. Shade is concealed in headrail when raised for a full, unobstructed view. Smooth, neutral back fabric eliminates cords or strings visible to the outside when shade is lowered.

Classic Roman shades feature horizontal ribs that create gentle folds of fabric when raised. Two different styles to choose from, the Classic Roman Shade is offered in a traditional flat-fold style or looped style. The flat-fold remains soft, flat and subtle when the shade is down while the looped style maintains cascading folds of fabric when the shade is lowered.

Two-on-One Headrail

Two independently operating shades on one headrail. Recommended for larger shades. Note: Theere will be a 1/4" light gap between the two shades. Fabric fold alignment should not exceed 1/4" from panel to panel.

Side by Side Alignment

Blinds hanging side-by-side should be noted at time of order so we can provide optimum slat alignment (may vary up to 1/4").

Visible Fabric Fold

Typically, when Cassette Roman Shades are fully raised, only a portion of the bottom rail remains visible under the headrail. In some instances, a fabric fold may not be completely concealed inside the headrail and may be
visible behind the bottomrail. This is a normal and inherent characteristic of this product and not considered a defect.

Product Specifications & Limitations

Cassette Roman Shades

Standard Shade		Two-on-One Headrail	
Minimum width:	12"	Minimum width:	24"
Minimum height:	16"	Minimum height:	16"
Maximum width:*	88"	Maximum width:	96"
Maximum height:		Maximum height:	
light filtering fabrics	102"	light filtering fabrics	102"
